SHOUHARDO III – CARE Bangladesh

Types and terminologies of Local Service Providers (LSP) & Community-level Facilitators (CLF)

The LSP model is a decentralized extension model whereby SHOUHARDO III trains local actors (farmers, business owners, breeders, etc.) to provide extension services (knowledge, technology transfer, training, etc.) to program participants. LSPs provide the local services in exchange for a service fee, whereas CLFs work as volunteers. The table below entails the description and areas of work of each LSPs/CLFs of SHOUHARDO III. The black-colored fonts are LSPs, and the blue-colored ones are CLFs.
